

# Deep-Dive Analysis & Interactive Dashboarding

## Sales Performance & Customer Insights Dashboard

### Submitted To

ApexPlanet Software Pvt. Ltd.

### Submitted By

Cherukuri Bhavya

---

## 1. Introduction

The objective of this project is to perform a comprehensive analysis of sales data, identify key business trends, define important KPIs, and develop an interactive dashboard that supports data-driven decision-making.

---

## 2. Dataset Description

Dataset Name: ApexPlanet\_DataAnalytics\_Dataset.xlsx

Total Records: 1000

Total Columns: 12

Columns Used:

- Order\_ID
- Order\_Date
- Customer\_ID
- Customer\_Name
- Age
- Gender
- City
- Product
- Category
- Quantity
- Unit\_Price
- Total\_Sales

---

### 3. KPI Analysis

#### **Total Revenue**

Total revenue generated from all sales transactions.

#### **Total Orders**

Total number of unique orders placed.

#### **Total Customers**

Total number of unique customers.

#### **Average Order Value**

Average revenue generated per order.

#### **Total Quantity Sold**

Total quantity of products sold.

---

### 4. Deep-Dive Analysis: Customer Segmentation

Customers were segmented based on their overall purchase value.

#### **High Value Customers**

Customers generating more than ₹150,000 in sales.

#### **Medium Value Customers**

Customers generating sales between ₹75,000 and ₹150,000.

#### **Low Value Customers**

Customers generating less than ₹75,000 in sales.

This segmentation helps identify premium customers and design targeted marketing strategies.

---

## 5. Visualizations

The following analyses were performed:

1. KPI Dashboard
2. Monthly Sales Trend
3. Category Analysis
4. Product Analysis
5. City Analysis
6. Customer Segmentation
7. Gender Analysis
8. Age Distribution

(Insert corresponding screenshots here.)

---

## 6. Key Findings

1. Revenue generation is concentrated among a limited set of products.
  2. Certain cities contribute significantly more revenue than others.
  3. High-value customers contribute a large portion of overall sales.
  4. Customer purchasing patterns vary across age groups.
  5. Monthly sales trends indicate seasonal fluctuations.
  6. Product categories differ significantly in their revenue contribution.
- 

## 7. Business Recommendations

1. Focus marketing efforts on high-value customer segments.
  2. Increase inventory for top-performing products.
  3. Expand operations in high-performing cities.
  4. Develop retention programs for medium-value customers.
  5. Use age-based customer targeting for promotions.
- 

## 8. Conclusion

This project successfully performed KPI analysis, customer segmentation, sales trend evaluation, and business performance assessment. The dashboard provides meaningful insights that support data-driven business decisions and strategic planning.
