TECHNICAL SKILLS

- **Programming Languages:** Python, C
- **Web Technologies:** HTML5, CSS3, Streamlit
- **Databases:** MySQL
- **Tools & Platforms:** Git, GitHub, VS Code, Flake8, Radon, Black

PROJECTS

CodeInsight — AI-Powered Code Reviewer <i>Technologies: Python, Streamlit, Flake8, Radon, Black, Git, GitHub</i>	[DEMO]
• Built a full-stack Python web application that automates code review by combining static style checks, cyclomatic complexity analysis, and security scanning into a single workflow. • Designed a composite code-health scoring system that consolidates results from multiple analysis tools into one actionable metric for developers. • Deployed with Streamlit and version-controlled on GitHub, enabling quick iteration and easy sharing with reviewers.	
ClimaTrack — Real-Time Weather Monitoring App <i>Technologies: Python, Streamlit, OpenWeatherMap API, Matplotlib, Git, GitHub</i>	[DEMO]
• Developed a real-time weather monitoring application using the OpenWeatherMap API, supporting city-based search and live display of temperature, humidity, and wind speed. • Implemented multi-city comparison with Matplotlib visualizations, allowing users to analyze weather trends across locations in a responsive interface.
